Diploma: Operations Management
Period: October 10 to November 14, 2013
Program: Specialization for Executives

Experience

2023 – Present **SICIM Guyana**
C6 Gas To Energy Project (GTE)

Client: ExxonMobil

Position: Supervisor Storekeeper

Warehouse and Logistics Supervisor in the pipe yard: Coordination of requests and orders for consumables for the project; direct coordination with all phase supervisors of the work: Civil and Mechanical, Welding, Pipe Laying, Coating, Cathodic Protection, Tie-In, Hydrostatic Testing. I am responsible for the receipt and dispatch of all installation materials; Piping, Mechanical, Instrumentation, Communication, Cathodic, Consumables, and other materials awarded for the construction of the pipeline. This includes receiving and storing project materials (procurement). The project involves a 12-inch natural gas pipeline.

2021 – 2023 **SICIM Perú**

Mantenimiento del ducto de Gas de Camisea

Client: Transportadora de Gas del Perú - TGP

Position: Logistics Supervisor

Coordination of the delivery of heavy and light equipment to the project, request and management of box consumables, control and maintenance of the units assigned to the project, work hour and maintenance reports, and corrective actions to units.

The project consists of the maintenance of the Camisea Gas Pipeline across the Coastal, Highland, and Jungle regions of Peru.

2017 – 2019 **SICIM México**

Gasoducto Sur de Texas – Tuxpan

Client: Transcanada

Position: Warehouse Supervisor

In this role at the South Texas-Tuxpan project, I managed coordination and order requests for materials, reception and dispatch of materials, equipment, and consumables. Tasks included box coordination, regular and tie-in line coordination, fuel control, receipt and dispatch of larger quantities, emergencies, stock management, bidirectional and manual welding, laying, trenching, reaming, defile, and metal carpentry workshop management. Stock safety and requirement needs were also managed.

The project involved 24" and 42" natural gas pipelines with additional works using 20" and 12" pipes for the sub-base of all jobs, ensuring full compliance with project requirements.

2015 – 2017 **SICIM SPA Sucursal del Perú**

Gasoducto del Sur

Client: Odebrecht

Position: Warehouse Supervisor

Generation of order requests, materials in the areas assigned to the project. The work involved a 24" natural gas pipeline and another of 42", for which all related materials were supplied. Managed safety stock and requirements as needed. Tasks included distribution of materials according to work fronts; Geotechnics, Manual Welding, Automatic Welding, Welding Workshop, Ultrasonics, Coating and Repair, Fuel Distribution, Offices, Optical Fiber, Right of Way, Maintenance, Trenching, Lowering and Backfilling. Coordinated helicopter flights for project supply. Supervised personnel and provided support in the KP-85 Stockpile area.

2014 – 2015 **Graña y Montero - Perú**

Planta Minera Inmaculada

Position: Warehouse Supervisor de Procura

Client: Grupo Hochschild Mining

Reception and distribution of materials and equipment for the mining plant and all its phases.

The construction project included a process plant, curved belt, tailings dam, ball mill, and SAG mill.

2003 – 2014 **Techint SAC**

Construcción y Mantenimiento del Gasoducto de GAS – Camisea

Position: Warehouse Supervisor

Client: Transportadora de Gas del Perú

The Camisea Project involved the construction of pipelines to transport natural gas and natural gas liquids from the Camisea fields across the Peruvian Andes to the Pacific coast. The system consisted of a 29-inch natural gas pipeline and a parallel 10-inch natural gas liquids pipeline, spanning 557 km and including four pumping stations and three pressure reduction stations.

Responsible for the receipt and dispatch of all installation materials, including piping, mechanical, instrumentation, communication, and consumables, among other materials for the construction of the Camisea Gas Pipeline. Managed distribution across warehouses and campsites in the coastal, highland, and jungle regions of Peru.

As the warehouse maintenance manager, I was in charge of a team of 13 personnel including supervisors and administrators.

In December 2013, I took over as the head of the Central Logistics Center, overseeing the mobilization and demobilization of construction for projects such as COGA, KP-127 (Kepashiato), Operation Toromocho, coordinating a workforce of 44 people across all of Peru's project warehouses and the main Logistics Center in Lurin.
